Professional Experience

Senior Frontend Engineer
Zomentum
Sept, 2020 - Current

- Currently working as a senior frontend engineer at Zomentum and looking over the infrastructure of the frontend repository.
- Led a team and rearchitected the frontend repository to monorepo architecture
- Led triage groups which result in increasing the crash-free session to 90%
- Worked on making the application performant and reduced page re-renders
- Worked on multiple large scale features which helped increase the revenue of the product
- Mentored multiple junior developers and documented the best practices within the organization.
- Implemented Design system and revamped the UI of the whole application
